

MORE THAN JUST A PRETTY CASE.

PERLICK CUSTOM CABINETS
THE PERFECT COMBINATION OF BEAUTY AND FUNCTION

DESIGN STANDARDS ARE KEY

Perlick offers the most versatile lineup of custom undercounter and back bar cabinets in the industry. Not only are they ideal for use in bars, but also in cafeterias, delis, wine shops and in many other venues, as well. Our all-stainless-steel construction and two-inch-thick insulation provide improved durability and energy efficiency. Superior cabinet construction combined with the highest Energy Efficiency Rating (EER) compressors in their class produce dramatically lower energy costs, and low-E glass doors offer better insulating characteristics, reducing possible condensation on the glass in humid conditions.

Have the doors and condensing unit cover of your cabinet finished at the factory in black or stainless steel, or be painted or laminated in the color or laminate of your choice. Your cabinet can also be prepared for laminating in the field to ensure a perfect match with your decor.

Why settle for just an ordinary refrigerated cabinet when you can have the versatility, along with the custom look, at a very competitive price?

Always raising the bar.
